

On the Subject of Mind Meld

You're gonna need *ESP* to solve this one — *Explosive-Solving Power*.

- The module has five Zener cards and a button that puts the module into the submission phase.
- Use the Zener cards to get a category.
- Click on any card to reveal what each of the four other players picked. Click any card again to reset and generate new cards.
- Using this information, you can figure out how each player picks their card. Once you do, press the red button in the bottom-right and click the card that nobody else will pick to solve the module (you can press it again to go back).
- See the **Categories** section to determine the category. See the **Rules** section to find the different rules. See the **Players** section to figure out what order the players pick in.

Categories

Use the column with the first symbol in reading order and the row with the last symbol in reading order.

Rules

The players will sort the cards with one of the orderings below. Either every player sorts in ascending order or every player sorts in descending order. No two players can use the same bullet point. If there are any ties, sort the items in the tie by ascending alphabetical order.

Once sorted, they will pick the first unpicked item in their list in player order.

- Alphabetical
- Given order in the Categories section
- Length
- Number of vowels*

* Vowels are A, E, I, O, and U.

Players

The players will pick in reading order of this table:
